**Dialog**<sup>®</sup>

Authoritative answers enriched by ProQuest

**The curious.**

**The empowered.**

**The inspired.**

**The achievers.**

Start here with the all-new ProQuest Dialog<sup>™</sup> service  
and professional resources from ProQuest.

## The authoritative content, innovative tools, and professional services you need.

As the world's first online service, Dialog paved the way for the information industry, offering some of the most sophisticated search and retrieval tools available. For experienced command language searchers, the legacy Dialog® service offers precision search capabilities with the added versatility of a Web-based environment. From concept testing to clinical trials, product launches to patent protection, Dialog has a long tradition of providing professionals with access to the right information to make smart business decisions. And now, we invite you to discover the all-new ProQuest Dialog™ service.

ProQuest Dialog shares the user-centric technology driving the all-new ProQuest platform—taking research and collaboration to a whole new level. The new ProQuest platform was built from the ground up to provide the best research experience in the industry. Powerful navigation tools surface the most relevant information from a wide range of content sources, while sophisticated post-search features make it faster and easier to refine results.

The result fuels innovation, reduces development costs, minimizes risks and can help generate new market opportunities.

## Discover the new ProQuest Dialog™ service.

Designed to support innovation across the enterprise, our next-generation service delivers critical information to help your organization **discover** new opportunities, **validate** the uniqueness of inventions, and bring innovative products to **market**. Offering ease of use for information professionals and knowledge workers across industries, ProQuest Dialog combines authoritative sources from Dialog® and DataStar® databases with an intuitive new interface and powerful tools to maximize your research and results. It's a fresh approach to precision searching based on relevancy, transparency, control, and completeness.

### ProQuest Dialog offers:

- Left-hand, embedded, and right-hand truncation
- Post-processing capabilities
- Retrieval of synonyms, plural terms, and alternate spellings
- On-the-fly document and interface translations
- Intuitive ways to limit results by facets

### ProQuest Dialog content coverage includes:

- Biomedical, Pharmaceutical, and Life Sciences
- Engineering and Technology
- Future releases will add Patents, Trademarks, and Copyrights, plus Business Intelligence, News, and Market Research

## Complementary resources from ProQuest enhance your research even more.

Central to innovative research around the world, ProQuest provides information from the world's most authoritative publishers along with the workflow tools to search, share, and manage it with speed and precision.

### Professional ProQuest Central

From primary scholarly journals, popular trade publications, annual reports, and dissertations to newspapers, newsletters, and newswires, Professional ProQuest Central offers global coverage of a wide range of disciplines. This CODiE award-winning online database provides one-stop access to more than 14,000 publications—with over 11,000 titles in full-text. Millions of articles in this continuously-growing database give users access to the arts, literature, history, health, sciences, and business content in ProQuest periodicals.

### ProQuest Dissertations and Theses

As the database of record for graduate research—and the official digital dissertations repository for the Library of Congress—this exceptional collection includes work by authors from more than 1,700 graduate schools and universities the world over, covering almost every conceivable subject. With more than 70,000 new full-text dissertations and theses added to the database each year, this authoritative and growing collection combines 2.9 million bibliographic citations with the complete full-text of over 1.4 million dissertations and theses.

### ProQuest Pharmaceutical and Medical Collections

ProQuest Pharma Collection covers not only medical, clinical, and scientific titles, but also offers extensive coverage of other topics valuable to all pharmaceutical company departments, including human resources, R&D, marketing, and finance. The collection provides access to over 2,600 full-text journals, as well as business, marketing, and communications journals—allowing you to refresh business strategy and keep up to date on market trends, brand positioning, and competitive intelligence.

ProQuest Medical Library™ provides for-profit hospitals and corporate libraries with full-text coverage on all major health care specialties, including pediatrics, neurology, pharmacology, cardiology, dentistry, obstetrics and gynecology, orthopedics, and surgery from more than 1,000 medical journals. A focused Nursing and Allied Health collection is also available.

### ProQuest Science and Technology Collections

Organized by specialist editors and featuring controlled vocabulary and thesauri, ProQuest Science and Technology Collection databases provide extensive, non-embargoed coverage of scientific, engineering, and technical disciplines from around the world. The collection offers ProQuest's renowned discipline-oriented abstracts as well as complementary full-text journals and grey literature such as conference papers, technical specifications, and patents. Plus, patented ProQuest Deep Indexing, first featured in the CODiE award-winning ProQuest Illustrata™ and now on the new ProQuest platform, categorizes data, variables, and other content represented graphically in published literature, including tables, maps, charts, photographs, and figures in context.

### ProQuest Statistical DataSets

ProQuest Statistical DataSets is a Web-based solution that allows researchers to build statistical tables and charts quickly and easily from multiple sources in a single interface. With access to billions of data points from hundreds of licensed and public domain datasets, this dynamic new tool allows users to scan contents of the collection, select subjects and variables of interest, and view data in side-by-side tables and charts.
